MEMORANDUM

To: File
From: Robert L. Craig
Subject: Sooner Dial Company, Clinton, Oklahoma

On September 11, 1967, I called at the Sooner Dial Company in Clinton, Oklahoma, for the purpose of discussing the cleanup procedures outlined in the inspection report dated June 23, 1965, and a letter dated December 20, 1966. Mr. Harold C. Bay was the only person contacted.

Mr. Bay stated that the use of radium luminous compounds had been discontinued and that requests for dials to be refurbished with radium luminous compound are returned to the customer. It was observed that the shop had been painted and the working surfaces covered with Formica. Mr. Bay said that the bench surfaces had been cleaned and painted before installation of the Formica tops. The original glass bench tops had been disposed of as well as all stock of radium luminous compound. Mr. Bay also stated that old dials suspected of having radium on them are discarded without having the paint stripped.
